RECLAIM: Y		TITLE V: Y		SIP:	AIR:		
Application No.	Permit No.	Permit Issue Date	Permit Status	Equipment Category	BCAT/CCAT Description	Application Date	Application Status

Report: April 19, 05, May 12, 2005

I conducted title V annual inspection and RECLAIM audit on April 19, and May 12, 2005. The RECLAIM audit period was January through December 2004. Mr. Eric S. Sramek environmental and Health & Safety manager discussed RECLAIM compliance and provided the requested data. Armstrong World Industries, Inc. manufactures vinyl floor tiles for residential and commercial use, and was operating on the days of the inspection.

The facility has one large source (D156), seven process units (D94, D95, D96, D97, D128, D129, D130), all of them are natural gas-fired, and three R219 exempt equipment; (1) Space heaters using natural gas, (2) Welder using gasoline, and (3) Steam cleaner using kerosene/Diesel. The facility meters readings for D156 and all process units are corrected for the pressure and temperature.

### AUDIT SUMMARY:

#### RTC (Trading Credits Compliance)

The facility has 4,995 pounds of NOx, expiring 12/31/04. During Year 2004 the total calculated, NOx emissions for quarters 1, 2, 3, and 4 were 4,575 pounds; therefore the annual compliance was met, with extra 420 pounds of NOx. Also facility didn't exceed/violate their allocation at all quarters

#### AES (Annual Emissions Summary)

RECLAIM Trading Credits Compliance Form RTCC-1 Part 1, indicates that the first quarter QCER was late 118 days; However during inspection, Mr. Sramek provided a copy of the first quarter QCER, post office marked April 30, 04, which was submitting within the proper time period.

The total reported NOx emissions were 4,576 pounds, which agreed with the calculated emissions. The facility provided very detailed recordkeeping, for RECLAIM and title V.

#### LGS (Large Source Quarterly Emissions)

RECLAIM Report Form for (LGS) emissions, indicates that 2ND Month, (February) wasn't reported, however facility provided record of submitting it within the proper time period. The Monthly data were properly transmitted to the SCAQMD and the calculated emissions agree very closely with the reported emissions

#### PRU (Process Unit Quarterly Emissions)

The quarterly data were properly transmitted to the SCAQMD.

The emissions from D95, D97, and D130 were measured, reported with the emissions from D94, D96, and D129, respectively. The practice of sharing a fuel meters between process units are acceptable as the process units have the same emission factors. The facility has been splitting the emissions between (D94&D95), (D96&D97), and (D129&D130) since the audit in January 2000. The calculated emissions agree very closely with the reported emissions.

#### Rule 219 Exempt Equipment

R219 exempt equipment that using natural gas (Space heaters) is estimated by using the difference between; [Total Gas Bills and (Total natural gas consumed by large device D156 + process units)].

R219 exempt equipment that using Gasoline and Diesel was estimated by using total gallons of fuel.

#### OTHER RULES AND REGULATIONS

The facility provided adequate records, is in compliance with facility title V permit conditions.

#### COMMENTS

The total natural gas purchased, (data provided by Armstrong) for the audit period 2004 were 47 MMSCF, which agreed with the total facility natural gas usage.
